Subject Activity Report  
Week Ending 4/28/85

1. Began packaging order for 40 bulk bags holding 1.5 tons each. This is our first order for bulk bags and the loading is quite labor intensive as the procedures are worked out and improvements made.
2. Contacted Mr. Morris at Morris and Sons coal yard. He said he would see if he could find a use for the plant coal quoted to him at \$42.50 per ton, F.O.B. plant.
3. Will visit Pitt Island in British Columbia to assess practicality of its iron source potential. Nate Fernow will accompany.
4. Arranged to meet with METRO on 4/30/85 to discuss our difficulty in disposing of the stockpiles as agreed in our site visit settlement. Their comment over the phone indicated an extension of the 5/1/85 deadline could be easily arranged.
5. Pioneer Construction Materials indicates that the costs to process our ASARCO slag into sand blasting grit would be prohibitive.
6. Began drilling four test holes at Blum sandstone site in Eastern King County.
7. No accidents. Visitors: Mr. Wells.
